Greeley, CO - Expedition Water Solutions Colorado LLC (“Expedition”) is excited to announce the official in-service of our newest disposal well, the EWS #1A, located at our EWS #1 facility off highway 14 near Briggsdale, CO. The EWS #1 will now operate two injection wells 24/7/365 with basin leading capacity, HSE standards and truck turnaround times. Expedition is thrilled to be able to accept volumes in excess of 25,000 Bw/d, further accommodating our loyal customers while continuing our growth story in the northern DJ Basin.

“We are very excited to open a second well at the EWS #1. Opening this well is another big step forward in executing our corporate strategy of expanding our footprint in the northern DJ Basin by providing high capacity, best-in-class facilities located in high demand and rural areas.”

- Zach Neal, Chief Commercial Officer & CFO

“We are very proud of our staff and team members who continue to offer a basin leading service at the EWS #1. As the focus on the northern DJ Basin field increases, we will continue to look at expansion opportunities to further serve our loyal customers.”

- Jim Goddard, President & Founder
